Contact Lens Evaluation

If you require a contact lens prescription today, a contact lens evaluation will be completed by the doctor with an evaluation fee based on the complexity of your prescription. This fee includes today's evaluation, diagnostic contact lenses if needed, and any additional follow-ups for 90 days unless otherwise authorized by the doctor.

Why do I need a contact lens evaluation?

- To determine the proper *contact lens prescription* based on your individual prescription, vision needs, and corneal health and curvature.
- To evaluate the health of the eye - paying close attention to the cornea, eyelids, and conjunctiva - and how contact lens wear affects the health of the eye.
- To examine the contact lens on the eye to ensure proper alignment with the cornea and lids.
- To measure vision and the contact lenses on the eye and make adjustments as indicated.

Associated Fees:

- **Contact Lens Fees:** Contact lens evaluation services may not be included as part of your routine vision benefits and additional fees may apply. Fees/copays are customized according to the complexity of care and the predicted time necessary to care for the patient. There are additional fees associated with contact lens insertion and removal training for first-time wearers.
 - Standard CL Evaluation \$82.00 Standard CL NEW Fit fee \$150.00
 - Specialty CL Evaluation \$98.00 Specialty CL NEW Fit Fee \$236.00

I acknowledge that the Kisiolek Eye Center team has informed me of the additional fees associated with being a contact lens patient.
